THE 7 AI MODULES

01

Dynamic Pricing

Revenue optimisation through
real-time market intelligence

02

Energy Management

Intelligent HVAC, lighting &
resource consumption control

03

AI Concierge

Multilingual 24/7 guest
assistance & service automation

04

Predictive Maintenance

Sensor-driven fault detection
& preventive scheduling

05

Smart Room Automation

Occupancy-aware climate,
lighting & comfort control

06

Video Analytics

Intelligent security, people
counting & space utilisation

07

Cybersecurity

Threat detection, IoT protection
& guest data security

BRAND VOICE

Intelligent

We speak with authority rooted in deep technical knowledge

Clear

Complex AI concepts explained in human language

Confident

We know what we've built — no hedging, no hype

Forward

Always looking at what's next, never backward

We build the intelligence layer that makes hotels think.

HospitAi replaces legacy hotel management with a unified AI platform — 7 modules, one brain, zero guesswork.
